Professional Experience

Zignuts Technolab | *Gandhinagar*

Front End Web Developer & Web Master (feb/2024 - Current)

- Ensured comprehensive mobile responsive UI layouts with understanding of HTML, CSS, and JavaScript.
- Troubleshoot issues and concerns, configure operation and analytic plugins, and design changes as needed.
- Worked directly with a diverse client base to understand and implement multiple technologies and programs.

Projects

Expense Tracker App

- Developed a responsive web application using Next.js to track and manage expenses. Implemented Firebase Authentication for secure user login and Firestore to store and retrieve expense data in real-time. Integrated Firebase Cloud Functions for efficient backend processing and data validation. Provided a user-friendly interface for managing categories, budgets, and transaction history. Deployed the app with Vercel for continuous integration and delivery.

E-commerce app

- Utilizing React Native, I engineered a dynamic e-commerce application tailored for mobile devices. This feature-rich app provides users with an intuitive platform for seamless shopping experiences on the go. Boasting a sleek mobile interface, customers can effortlessly explore a diverse catalog of products, add items to their carts, and securely complete transactions. The app is fortified with secure authentication mechanisms, ensuring user data protection and integrity throughout their shopping journey. Additionally, push notifications keep users informed about order updates and promotions, enhancing engagement and user satisfaction.Clerk Authentication for secure and seamless login experience State management using React hooks for efficient shopping cart and user data handling
